

Press Release

Looking for the perfect make up brush was the inspiration that lead cosmetics devotee and business woman Anna Szabo to create "Glitter" - beauty products and cosmetics accessories for the discerning women.

After searching for a brush roll with all the necessary tools to create the 'perfectly made up face', Anna realised just how expensive and demoralising her mission would become. On realising that she settled for buying just one brush "Even though the brush was terrific I felt that I had been duped, there was no value added and I thought that while the brush belonged to a high end brand there was no value for money, I certainly didn't feel like I was buying luxury even though I was paying for it", said Anna.

With this inspiration Anna scoured the world to find high quality brushes that she could launch Glitter with. "When you are investing in an item such as make up brushes you want them to be well packaged, beautiful and lasting quality at a cost effective price", she said.

Glitter is all about chic innovative style, quality is not compromised. Whether it be a single brush or a complete set each is beautifully packaged in its own box. The brush bags are all leather with durable and easy to clean nylon lining, each with a handy pocket to store make up essentials in.

There are three different handle finishes to choose from: white pearl, mahogany and charcoal. A free leather roll bag which resembles an elegant clutch purse is included with the 8 brush set (RRP \$195.00) or 21 brush set (RRP \$395.00). They are available in black or chocolate brown. The bags can also be bought separately for \$55.00 for the small and \$75.00 the large one.

Individual brushes start at only \$10.00 for a lash groomer to \$40.00 for a generous powder face brush.

"We are always told that a sensational make up result is dependant on application, I am a believer, now at last you can have quality cosmetics products without compromising your budget", Anna concluded.

Glitter brush sets are the first of many great new products that are in the pipeline to be launched in Australia over the coming months.
